- IsiZulu (Home Language)
- Afrikaans (Basic)

ABOUT ME

From a young age, I have been captivated by the possibilities of technology. My journey began with countless hours spent in front of a computer screen, exploring the intricacies of software and programming. Despite the lack of resources and guidance in my early years, I was determined to pursue my passion. The emergence of platforms like Facebook and the advent of the internet during the dot-com era further fueled my curiosity and propelled me into the world of IT.
